

ISO 13628-8 Class 1-4 (API 17D) Gauging Tool Torque Tool Accessories.

DESCRIPTION

The Class 1-4 Gauging Tool has been developed to test interfaces. The interfacing part of the tool is identical to the Class 4 Torque Tool and comes with a set of class 1-4 sockets as standard. This allows rapid interface checks without the weight and hydraulic requirements of using a real torque tool.

The tool can be turned by hand from a handle at the rear, or can be fitted with a shaft at the rear to accept a torque wrench, so that torque can be applied to the valve. Locking wings are provided to check the latching operation.
