

## ISO 143628-8 Bucket Lift Tool

ROV Tools.

### DESCRIPTION

The bucket lift tool is designed for subsea lifting operations on objects with vertical torque tool buckets. It is a manually operated tool. Subsea, it is operated by robotic manipulator. The tool is operated by turning the paddle handle by 90 degrees. The handle has a detent mechanism to guard against accidental operation. Once a load has been picked up the handle cannot be turned, preventing accidental release of the load.

### FEATURES
