PSSL Training

DESCRIPTION

Forum Subsea Technologies is proud to offer a of range training courses to complement our comprehensive range of ROVs & associated products. The courses cover technical descriptions of all aspects of the system, including design, operations, maintenance & system expansion.

The course is primarily classroom based with interactive whiteboard facilities, but practical content is featured wherever possible.

The full TXLX/R Simulator is available for trainees.

Custom courses for different tooling/vehicles & application can also be provided.

Longer courses can be arranged with the assistance of our third party training partners
