

Reach

**ARTIFICIAL LIFT & FRAC HIT
RECOVERY FROM SURFACE**

- As a Standalone Solution
- With Gas Lift
- With Plunger Lift
- With Rod Pump

▶ Start boosting your multiphase production, from the surface at any stage of your well's lifecycle

Evaluate and Simulate

We partner with you to evaluate your well portfolio, simulate your wells and reservoirs to understand your specific needs, and provide the best solution for you.

Install

Simple, quick and effective—we offload on your site, connect to your production line, and we're up and running in the same day.

Operate

Your well is subject to a wide range of changing conditions, short-term and long-term. Flexible Reach solutions self-adjust to accommodate, keeping your production flowing.

Monitor and Maintain

We monitor and maintain your well's production journey so that it meets its full potential. We keep you operational, running smoothly to meet your performance expectations.

REACH SYSTEM & CAPABILITIES

- Plug-and-play, connecting directly to the well at surface to boost multiphase production
- Broad and highly flexible operating envelope
- Compact, lightweight and easily transportable
- Installs within 24 hours
- Significant reduction in methane emissions

POWERED BY HICOR, AN ADVANCED PROPRIETARY MULTIPHASE COMPRESSOR OFFERING

- Wide range of multiphase operating conditions (80 - 100% GVF)
- Liquid injection enabling compression ratios up to 40:1
- Self-adjusting to provide broad operating range and flexibility
- 5 psig minimum suction to 500 psig maximum discharge pressures
