

LAOT Surface Verification Unit

The FET LAOT Surface Verification Unit offers a capability to measure the force generated by an LAOT on deck prior to diving. The verification unit is suitable for loads up to 1000 kN and features a handheld digital display unit.

Part Numbers

A036-049-731 LAOT Verification Unit

Specifications

Input Interface	API 17H, July 2019, Linear Push Interface Type A EN ISO 13628-8:2008 Linear Push Interface Type A
Maximum Load	1000 kN
Load Cell Accuracy	1% of scale
Materials	17-4PH (H1150 + 1150) body ST-ST Load Cell
Weight	69 kg

Note: this unit is not for use subsea.
