

## Introducing the new **DuraLine™** Manifold

Meet our next-generation, modular, lightweight, skid-based manifold. Rig up your mainline connection in less than five minutes with one operator.

A significant portion of the time and effort expended during a pad move goes into manifold rigging and derigging. API iron is heavy; aligning and mounting — or disassembling — requires several man-hours. And even with the best team, leaks between API flanges with metal-to-metal seals are common.

Get to the revenue-earning pumping phase in a fraction of the time with the FET Well Stimulation DuraLine™ manifold package:

- Each modular, skid-based DuraLine™ manifold package contains four ports. Add units to easily size the manifold to any job.
- FET Well Stimulation's innovative, hub-style DuraLock™ connectors enables each manifold skid to install with just four bolts, instead of the API flange standard of 16. Moreover, our elastomeric DuraLock™ seal interface reduces leaks by eliminating metal-to-metal seals and simplifying installation.
- Offered standard with FET Well Stimulation's manifold-mounted Ajax™ crane, rigging units takes just one operator. With FET Well Stimulation Serpent Series™ hoses, the DuraLine™ system weighs 60% less than comparable manifold systems. And after setting up your first FET Well Stimulation Ajax™ crane, there's no need to maneuver forklifts around iron and hoses in the frac fleet — or risk back injuries.

WELL STIMULATION

# WELL STIMULATION

## Comparing FET Well Stimulation manifold systems

Attribute	HydraLine™	DuraLine™
Mounting	Trailer- or skid-mounted	Skid-mounted
Ports	Modular (2-port cross)	Modular (4-port cross)
Flow line	Serpent Series™ high-pressure hoses	Serpent Series™ high-pressure hoses
Connections (small bore)	3" DuraLock™ hub (1 bolt)	3" DuraLock™ hub (1 bolt)
Connections (large bore)	7 1/16" API flange (16 bolt)	7" DuraLock™ hub (4 bolt)
Hammer unions, swivels & pup joints	Eliminated	Eliminated
Mainline flanges	N/A	Eliminated
Integrated manifold crane	Add-on	Standard
Commercial terms	Purchase	Lease

## About FET Well Stimulation

FET Well Stimulation designs and manufactures innovative, best-in-class solutions for the hydraulic fracturing industry:

- Our fast-connecting **manifolds** improve flow while reducing nonproductive time.
- Our long-lasting **frac pumps** provide unbeatable field performance.
- Our innovative **valves, seals, and clamps** install quickly while boosting pump performance.
- Our high-pressure, **flexible hoses** reliably replace traditional iron.
