

Cannon Cast Cable Protectors

Engineered for Excellence. Built for Reliability.

The **Cannon Cast Cable Protector** is the latest innovation from FET, designed to tackle the toughest challenges in artificial lift and beyond. Engineered with precision and built for reliability, this solution delivers unmatched protection, performance, and peace of mind.

Why Choose Cannon Cast Cable Protectors?

Fast, Hassle-Free Installation

Save time and reduce labor costs with a design that installs quickly—no bands required.

Protect What Matters Most

Prevent costly failures and downtime. Our protectors shield your ESP cables, control lines, and capillary tubing from damage during installation and operation.

Versatile by Design

Supports multiple cable and control line configurations, making it ideal for a wide range of applications.

Expert Support

Our experienced engineering and applications team is ready to help you customize and optimize your cable protection strategy.

Advanced Engineering. Proven Performance

- ▶ **Lightweight, High-Strength Design**
- ▶ Built from ductile iron for superior impact resistance without the bulk.
- ▶ Accommodates 1/4" and 3/8" capillary tubing, as well as standard ESP cables, with a lower running diameter for smoother deployment.
- ▶ **No Loose Parts**
- ▶ Integral fasteners ensure secure installation and eliminate the risk of dropped components.

Tailored to Your Needs

- **Custom Stainless Steel Assemblies** — Perfect for corrosive environments where durability is critical.
- **Flexible Configurations** — Design to fit:
 - > API and non-API tubing
 - > Multiple capillary and control line setups
 - > Various communication line sizes
 - > Virtually any ESP cable on the market

Applications

- ESP Cable Protection
- Capillary and Hydraulic Control Line Protection
- Communication and Specialty Cable Protection

Ready to protect your investment and streamline your operations? Let Cannon Cast Cable Protectors be your first line of defense in the field.
